Hi Joe,

Enclosed is a copy of the Shelby American Company, Inc. Vehicles in service as of August 31, 1969. The Hi-Lited area is your car. It looks to be among 12 vehicles used for Fuel Injection development. (4-GT350 & 8GT500) The car was assigned to Mr. Fred Goodell was in charge of many of the Shelby projects from 1967-70.

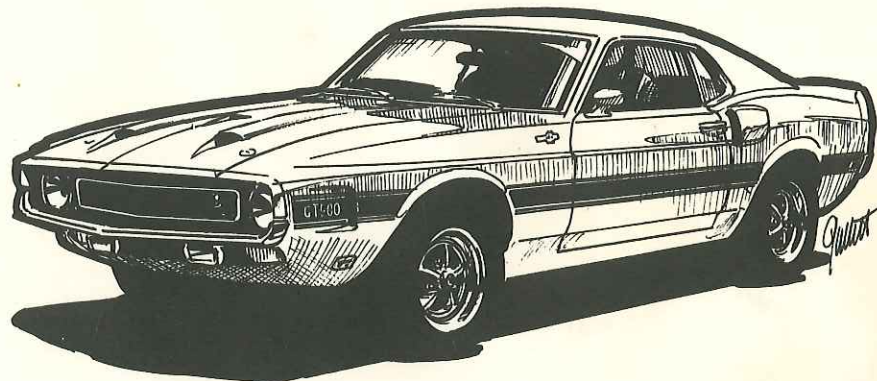

If you find anything else as you are going thru the car let me know. If you take any photo I would like a copy for the records.

Some of the things I thought of after we hung up were,

1. What did the Cougar Speedo read in MPH?
2. What did the Tach go to in RPM?
3. Were the console and gauges on the floor like the other 69-70 Shelbys?
4. The correct trans will have the cars ser. no. stamped in the top of the case? Can you read them?

Also you will see on the factory paperwork (copy) places and persons these cars were assigned to. Some very famous. You'll also see some other than Shelby cars which were also assigned to the Shelby group.

Best of luck and let me know what you find.

Vincent
